Goldspar tapered aluminium flagpoles are manufactured to comply with Australian Standards (AS1170.2 1989) from high quality 6063/6060 marine grade aluminium. All poles have structural engineering certification for above ground structures. Consult your structural engineer for in-ground certification.

Designed to enhance the look of public and corporate spaces Goldspar aluminium flagpoles are elegantly tapered using our unique production processes. Elegant, durable and maintenance free, Goldspar flagpoles add the perfect finishing touch to clubs, councils, schools, hotels, exhibition centres, business parks or other commercial and residential applications. Goldspar flagpoles range from 3 metres to 20 metres and are designed to withstand winds up to 51m/s with higher load poles available to special order.

Goldspar Australia Pty Ltd
manufacturers of flagpoles for over 30 years
